Repository overview

An overview describes what your image does and how to run it. It displays in [the public view of your repository](#) once you have pushed some content.

Docker commands

Public view

To push a new tag to this repository:

```
docker push jagadeesh2809/react-multi-jagadeesh:tagname
```

Build with Docker Build Cloud

Accelerate image build times with access to cloud-based builders and shared cache.

Docker Build Cloud executes builds on optimally-dimensioned cloud infrastructure with dedicated per-organization isolation.

Get faster builds through shared caching across your team, native multi-platform support, and encrypted data transfer - all without managing infrastructure.
